Profile of the Economy

(Office of Macroeconomic Analysis)

May 22, 2026

Introduction

The U.S. economy strengthened during the first quarter of 2026, driven by stronger growth of business fixed investment and the recovery from the federal government shutdown over October and part of November 2025. Solid growth in the private sector continued to underpin performance. In addition, there have been signs of increased demand for labor in the first several months of 2026, with selected improvements in labor force participation. Initial and continuing claims remain near historically low levels. Rising energy prices in connection with the U.S.-Iran war have temporarily driven headline inflation higher in very recent months, although key components of core inflation continue to recede.

Economic Growth

According to data as of May 22, real GDP growth had increased by 2.0 percent at an annual rate in the first quarter of 2026, according to the advance estimate. Over the past four quarters (Q1/Q1), real GDP has increased by 2.7 percent. This followed a gain of 0.5 percent in the fourth quarter and a 4.4 percent advance in the third quarter. The first quarter's acceleration largely reflected strong growth in business fixed investment (BFI), recovery from the federal government shutdown in the fourth quarter, and a slower drawdown in private inventories. Growth in the private sector, particularly for firms' capital expenditures and overall business investment remained robust during the first quarter and bode well for future economic growth.

Decomposing GDP into its components can be helpful in explaining the economy's performance. The four components we consider are: (1) private domestic final purchases (PDFP), the most persistent and stable component of output, consisting of personal consumption expenditures (PCE), business fixed investment (BFI), and residential investment; (2) government consumption and investment; (3) net international purchases (U.S. exports less U.S. imports); and (4) intermediate demand (or the change in private inventories). Examined separately, each component delivers specific information about activity in various sectors that can also be useful in predicting the future path of growth.

The first component, PDFP (also called "core" GDP), is most important because it measures the private sector's capacity to drive self-sustaining growth and, therefore, may signal the direction of future economic performance. In the first quarter, real PDFP growth was 2.5 percent at an annual rate—or 0.7 percentage points faster than the fourth-quarter pace—accounting for 2.2 percentage points of total GDP growth.

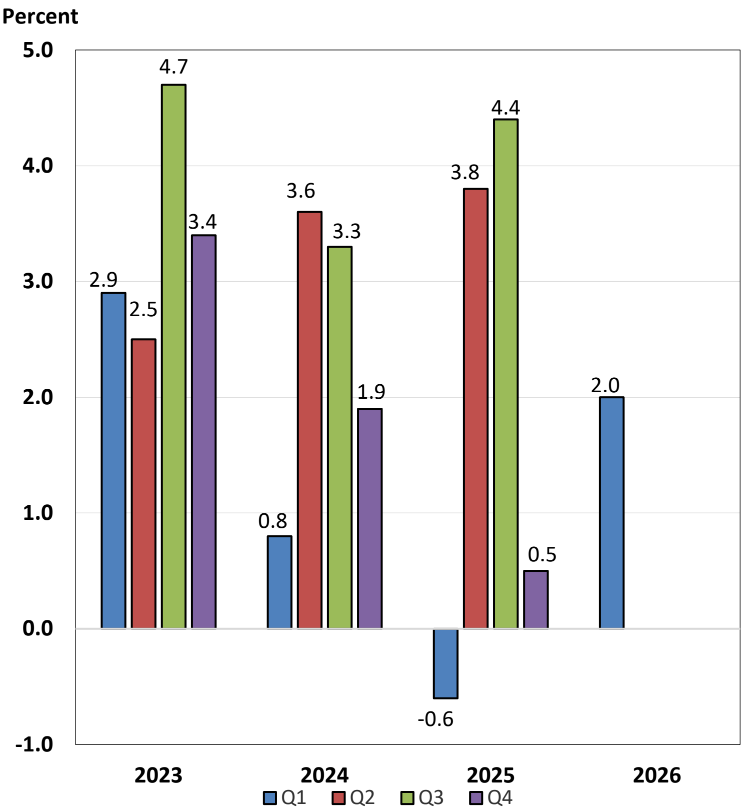
BFI growth quadrupled from 2.4 percent in the final quarter of 2025 to 10.4 percent at an annual rate in the first quarter of 2026 and made the largest contribution to growth of any component at 1.4 percentage points. The sharp acceleration reflected a 17.2 percent advance in business equipment investment (roughly four times the 4.3 percent pace in the previous quarter), driven largely by increases in information processing equipment. Investment in intellectual property products accelerated to a 13.0 percent annual rate, up from a 5.4 percent pace in last year's fourth quarter and was driven by a significant increase in spending on software. Although overall structures investment declined during the first quarter (by 6.7 percent at an annual rate, essentially matching the size of the previous quarter's decline) investment in data centers jumped over 22 percent at an annual rate.

PCE grew by 1.6 percent at an annual rate in the first quarter, following a 1.9 percent advance in the fourth quarter of 2025, and made the second-largest contribution to growth, at 1.1 percentage points. Purchases of goods ticked down by 0.1 percent, after edging up by 0.3 percent in the fourth quarter. The slight decline in the latest quarter reflected a flat reading in durable goods spending, and a 0.2 percent decline in purchases of nondurable goods. Meanwhile, growth in services PCE rose by 2.4 percent in the first quarter, just 0.3 percentage points slower than the fourth quarter's rate.

Residential investment fell by 8.0 percent in the first quarter, a steeper drop than the fourth quarter's 1.7 percent decline, which shaved 0.3 percentage points from GDP growth. The first quarter decrease reflected a 10.1 percent drop in the other structures category (which includes brokers' commissions from home sales) and a decrease of 8.0 percent in single-family structures. However, investment in multi-family structures increased by 1.9 percent.

Turning to the other components of GDP, changes in government spending and private inventories increased calculated GDP, while the drag from net exports increased, as imports grew faster than exports. The end of the federal government shutdown in the previous quarter drove a 9.4 percent rebound in federal expenditures in the first quarter, while state and local government spending was relatively stable, rising 1.6 percent. Overall, government outlays rose 4.4 percent in the first quarter and added 0.7 percentage points to growth. Private net inventory investment contributed 0.4 percentage points to first quarter growth, after adding 0.1 percentage points in the fourth quarter. Net international demand subtracted 1.3 percentage points from real GDP in the first quarter, after shaving 0.2 percentage points in the fourth quarter. Imports grew by 21.4 percent, exceeding the 12.9 percent increase in exports.

Growth of Real GDP
(Quarterly percent change at annual rate)



Labor Markets and Wages

Labor markets have improved in recent months, with job growth picking up thus far in 2026, the unemployment rate ticking lower, and selected measures of labor force participation increasing.

Payroll employment growth slowed materially in 2025, in part because of federal government payrolls declining, but growth has picked up so far in 2026, underscoring labor market resilience. Total payroll growth has accelerated sharply thus far in 2026 to an average of 76,000 per month, significantly higher than the 2025 average. The employment report for April showed total payrolls increasing by 115,000, with private sector payrolls advancing by 123,000. Although payroll growth for the health care and social assistance industries continued to dominate employment growth in 2025 and early 2026, job growth has been more broadly based this year. Excluding health care and social assistance industries, private industries added an average of 31,000 net jobs per month from January to April.

The unemployment rate has trended lower since November and stood at 4.3 percent in April 2026. A broader measure, the underemployment rate that captures discouraged, marginally attached, and part-time workers, stood at 8.7 percent in November 2025 but has since pulled back to 8.2 percent as of April 2026. Both rates remain relatively low by historical standards. Higher frequency data also show that initial and continuing unemployment claims are at historically low levels. Recent readings are in line with levels just before the start of the COVID-19 pandemic in the United States. As of the week ending May 16, the level of initial unemployment insurance claims was slightly higher than the level at the end of December 2025, and as of the week ending May 9, the level of continuing unemployment claims was about 6 percent lower over this timeframe.

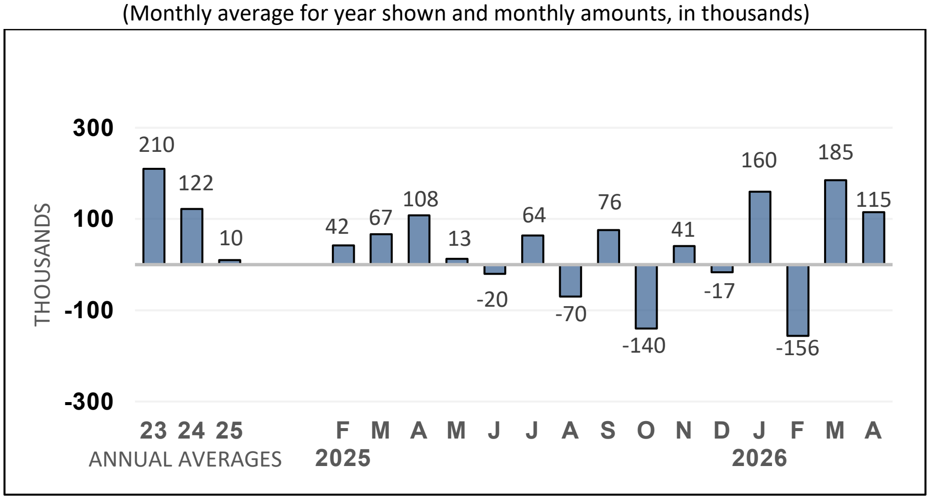
The labor force participation rate (LFPR) fluctuated in a range of 62.2 percent to 62.6 percent, during 2025 before trending slightly lower in early 2026, reflecting lower participation of older workers. As of April, the LFPR was 61.8 percent, still signaling a relatively strong supply of labor. Prime-age (ages 25-54) worker participation has underpinned overall participation, fluctuating in an elevated range of 83.3 percent to 83.8 percent during 2025. In January 2026, the prime-age LFPR advanced to 84.0 percent, the highest level in almost 25 years, and stood at 83.8 percent as of April 2026. This rate is 0.9 percentage points higher than the rate in February 2020, just prior to the start of the pandemic.

The pick-up in labor demand so far this year is evidenced by the number of job openings that have increased by almost 5 percent on the year through March 2026 (latest data available). The ratio of job vacancies to unemployed workers also has gradually increased since late 2025. In December, there were 0.87 job openings per unemployed worker, but as of March 2026, this ratio had increased to 0.95 job openings per unemployed worker. Still, these readings are well below the pandemic-related record high of 2.02 vacancies and the 2019 average of 1.19.

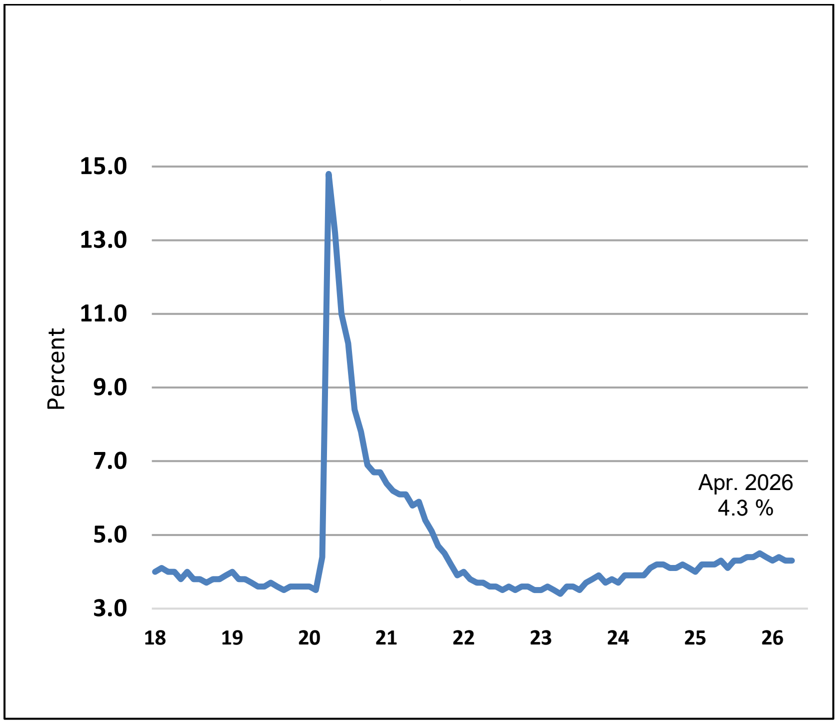
Measures of wage growth in the private sector were stable at an elevated level last year, showing limited signs of slowing. Looking at quarterly averages of twelve-month growth rates, nominal average hourly earnings of all private sector employees grew by 3.9 percent per month during the second, third, and fourth quarters of 2025, and by 3.6 percent during the first quarter of this year. Over the year through April 2026, nominal wage growth was 3.6 percent. Earnings growth in real terms remained positive through the first quarter of 2026, with twelve-month growth averaging 0.9 percent over the quarter. However, over the twelve months through April 2026, real wages declined by 0.3 percent.

Payroll Employment

(Monthly average for year shown and monthly amounts, in thousands)



Unemployment Rate
(Percent)



Prices

After peaking in June 2022 at 9.1 percent on a twelve-month basis, headline inflation as measured by the consumer price index (CPI) slowed significantly over the intervening years, dropping to a four-year low of 2.3 percent in April 2025. In January 2026, twelve-month CPI inflation stood at 2.4 percent, just slightly above the previous year's low, reflecting a noteworthy slowing of key components. Due in part to recent fluctuations in energy prices arising from the conflict with Iran, however, headline inflation has picked up in recent months. Over the year through April, headline CPI inflation was 3.8 percent, largely reflecting monthly energy prices and related categories.

Energy price inflation has increased in recent months, after a period of relative stability or downtrend. In January 2026, twelve-month energy price inflation was -0.1 percent. Annual energy inflation picked up in recently months, reflecting impact from Iran's closure of the Strait of Hormuz, through which 20 percent of global oil supplies are shipped. Over the year through April 2026, energy inflation was 17.9 percent, a reversal from the 3.7 percent decline over the previous twelve months.

Food price inflation has been mixed thus far in 2026. On a twelve-month basis, food price inflation was 3.2 percent over the year through April 2026, moderately faster than the 2.8 percent rate from a year earlier.

Core inflation, which excludes energy and food, has remained relatively stable. Twelve-month inflation averaged 2.9 percent during the latter half of 2025 but slowed to an average of 2.6 percent during the first four months of 2026. Core inflation stood at 2.8 percent over the year through April 2026.

Core goods price inflation has eased modestly since mid-2025. On a twelve-month basis, core goods price inflation had picked up to a two-year high of 1.5 percent in August and September 2025. Through April 2026, core goods inflation was 1.1 percent over the year.

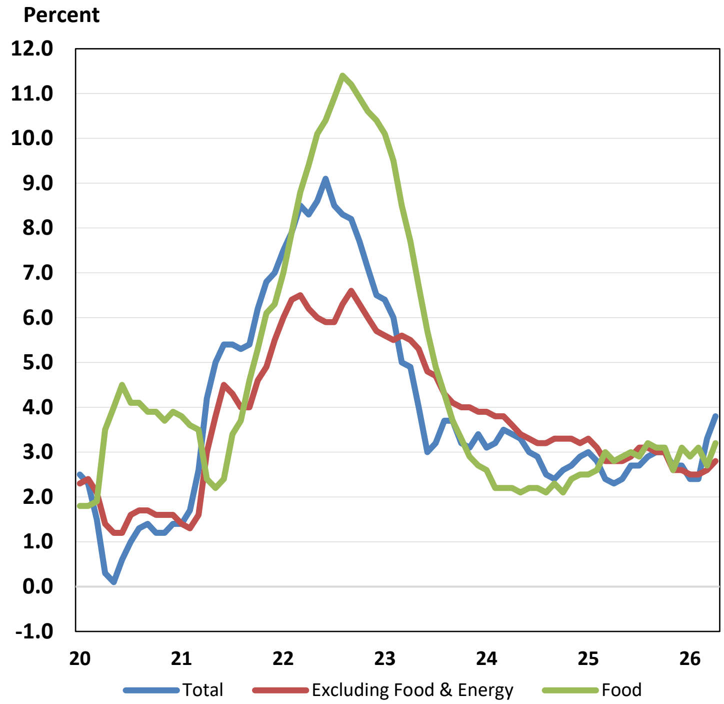
The major driver of core services inflation continued to recede, providing stability of overall core CPI readings. Rent of housing services (rent of primary residential and owners' equivalent rent, or OER) has the largest weight in the core CPI. For 19 months through August 2025, monthly inflation for this component largely hovered between 0.3 percent and 0.4 percent. Since August, rent of housing inflation moved to a lower range of 0.2-0.3 percent per month–although in April 2026, monthly inflation rose to 0.5 percent, reflecting a one-time adjustment to account for missing data related to the 43-day federal government shutdown in 2025 Q4. Over the year through April 2026, rent of housing inflation was 3.2 percent, or 1.0 percentage point below the year-earlier pace.

Despite slowing of some components of core inflation, the CPI for non-housing core services has picked up recently. Inflation in this metric averaged 0.2 percent in the fourth quarter of 2025. During the first quarter of 2026, the CPI for non-housing core services averaged 0.4 percent, partly reflecting rising air travel costs and other entertainment and travel categories. In April, core non-housing services inflation ticked up to 0.5 percent. Annual inflation for core non-housing services was 3.4 percent over the year through April 2026, or 0.6 percentage points above the year-earlier rate but down considerably from the 4.9 percent pace two years earlier.

Inflation as measured by the PCE price index is the Federal Reserve's preferred measure of inflation: the FOMC's 2 percent inflation target is expressed in terms of headline PCE, and core PCE inflation is also taken into consideration. There are notable differences in weights and methodologies between the CPI and the PCE measures. Headline PCE inflation slowed to a low of 2.3 percent over the twelve months through April 2025—or 0.3 percentage points above the FOMC inflation target—while core PCE inflation was 2.6 percent over that same period. Since then, both rates have generally trended higher, and as of March 2026 (latest data available), twelve-month headline PCE inflation had accelerated to 1.5 percentage points above the target, or 3.5 percent, and the core reading was 3.2 percent.

Consumer Prices

(Percent change from a year earlier)



Housing Markets

Net single-family planned and new construction, as measured by permits and starts, increased in the first quarter, extending the fourth quarter's gains. Single-family permits increased by an average of 0.6 percent per month in the first quarter, after ticking up 0.1 percent per month on average in the previous quarter. However, single-family permits declined by 2.6 percent in April. New single-family starts increased by an average of 2.8 percent per month during the first quarter, after rising 4.2 percent on average per month during the final quarter of 2025 but plunged 9.0 percent in April. Over the twelve months through April 2026, single family permits were down by 5.5 percent, while starts declined 2.4 percent.

Movements in planned and new construction activity for multi-family units (condominiums, co-ops, and apartment buildings) can be volatile. Multi-family permits increased, on average, in the second half of 2025 but fell an average of 5.8 percent per month in the first quarter of 2026. before surging by 21.8 percent in April 2026. Multi-family starts have also been quite volatile from month to month: after declining on average in the fourth quarter, starts grew by 4.8 percent on the same basis during this year's first quarter, then jumped by 10.3 percent in April. Over the year through April 2026, multi-family permits were up by 9.2 percent and multi-family starts grew by 19.7 percent over the same period.

Meanwhile, continuing construction activity continued to slow throughout 2025 and into early 2026. Total units under construction declined by 1.0 percent on average per month during the fourth quarter of 2025, then edged down by 0.2 percent per month on average during the first quarter of this year. The most recent decline reflected a 0.6 percent average drop in multi-family construction which more than offset a 0.2 percent average increase in single-family building. At 1.128 million in April 2026, the total number of units under construction is significantly below the record high of 1.714 million reached in October 2022 (data series began in 1970) but remains above the 2019 average of 1.148 million. Home builder confidence, as measured by the National Association of Home Builder's Housing Market Index, trended sharply lower during 2025, and in June as well as August stood at a 2½-year low of 32. However, in the final quarter of the year, as well as the first quarter of 2026, the index has remained in a higher range of 37 to 39. Although the index dropped to 34 in April, it rebounded to 37 in May, 3 points above the year-earlier level.

After improving in previous quarters, home sales declined on average in the first quarter of this year, and existing home sales remain near lows last seen in the aftermath of the global financial crisis. Existing home sales— which account for a supermajority of all home sales— declined by 2.0 percent per month on average during the first quarter of 2026, then grew 0.2 percent in April. Over the twelve months through April, home sales were flat-- though this marked an improvement after several months of year-over-year declines. In contrast, new home sales remain above pre-pandemic readings, though new home sales currently account for only about 15 percent of total home sales and have been volatile month-to-month. Sales in this category rose in each of the previous three quarters before declining in this year's first quarter by an average 1.2 percent per month. Yearly growth rates have been mostly positive since last August, and over the year through March 2026, new home sales advanced 3.3 percent.

Inventories of existing homes for sale are above year-earlier readings but remain well below pre-pandemic readings as current homeowners are locked into low, pandemic-era mortgage rates. Months' supply of existing homes for sale stood at 3.5 months in December 2025, but by April 2026, had climbed to 4.4 months. The new home market does not suffer from the same lock-in effect, and inventories are well above pre-pandemic levels. Inventories of new homes on the market increased to 9.6 months in May 2025 before trending lower the rest of the year, but surged to 9.8 months in January 2026, before easing to 8.5 months as of April 2026. Despite recent fluctuations, supply remains elevated: before the pandemic, a supply of roughly 6 months was typical for the new home market.

Monthly home price growth rates were relatively modest through most of 2025, then ticked up in the final quarter of the year before slowing again in early 2026. Twelve-month measures have continued to slow over this timeframe. Relative to peak rates, home price growth rates have also slowed considerably and are currently below pre-pandemic era rates. The S&P Cotality Case-Shiller 20-city house price index—which measures sales prices of existing homes—averaged a 0.5 percent increase per month in the fourth quarter of 2025, then slowed to an average 0.1 percent per month during the first two months of this year (latest available). Over the year through February 2026, the 20-city index was up 0.9 percent, slower than the 4.5 percent, year-earlier advance and marking the slowest 12-month rate in nearly three years, as well as a tiny fraction of the 21.3 percent twelve-month peak rate posted in April 2022. The FHFA purchase-only house price index averaged 0.4 percent per month during the final quarter of 2025, then slowed to an average 0.1 percent during the first two months of this year. Over the year through February 2026, the FHFA measure was up 1.8 percent, less than one-half of the 4.2 percent pace over the year through April 2025 and the slowest 12-month rate since March 2012, as well as a very small fraction of the peak rate of 19.0 percent posted over the year through July 2021.

Consumer and Business Sentiment

Measures of business and consumer mood trended lower in 2025 and in early 2026. The University of Michigan's consumer sentiment index stood at 44.8 in May 2026, reflecting an energy-related downturn in households' assessments of current conditions as well as a more moderate decline in the expectations index. Median inflation expectations also increased in the May survey, the third since the onset of the military conflict with Iran: year-ahead inflation expectations stood at 4.8 percent in May, 1.4 percentage points above the February reading, while five-year inflation expectations rose to 3.9 percent in May, 0.6 percentage points above the rate in February. Compared with a year earlier, though, the May survey showed improvements in inflation expectations: year-ahead expectations were 1.8 percentage points lower, and five-year expectations were 0.3 percentage points lower. (In the five years before the pandemic and its subsequent inflation, long-run inflation expectations were consistently at or below 2.8 percent.)

The alternative consumer confidence survey from The Conference Board also has indicated somewhat soft household sentiment in 2026. After ranging between 92.9 to 98.7 in the latter half of 2025, the headline index has fluctuated between 89.0 and 92.8. As of April 2026, the index stood at 92.8. The present situation index followed a similar downtrend as the headline index, but the expectations index has been relatively stable since May of 2025, save for a dip in January 2026. As of April, the present situation index stood at 123.8 while the expectations index was 72.2. Although persistent readings below 80 have been associated with recession risks, The Conference Board's expectations index has been at or below 80 for thirty-six of the last forty-eight months.

Turning to private firms, the National Federation of Independent Business's (NFIB) small business optimism index had climbed to 105.1 in December 2024, the highest level since 2018 and well above the 51-year average of 98.0. The index averaged 99.2 in 2025 and ended the year at 99.5 in December. Since then, the small business optimism index has trended lower, and by April 2026, had declined to 95.9, below last year's as well as the long-term averages.

Federal Budget Deficit and Debt

The fiscal deficit as a share of GDP during the previous Administration ended as the largest in history outside of a war or recession at 6.3 percent of GDP in FY 2024. In FY 2025, which ended last September, the deficit narrowed to $1.77 trillion, equal to 5.8 percent of GDP as an increase in receipts more than offset rising outlays. Total federal receipts rose by $317 billion to $5.24 trillion (17.2 percent of GDP) in FY 2025. Meanwhile, outlays rose by $276 billion to

$7.01 trillion (23.1 percent of GDP) in FY 2025, reflecting higher spending on Social Security, increased Medicare outlays, and higher net interest payments on the federal debt.

From October 2025 to April 2026, the fiscal year-to-date federal deficit totaled $953.6 billion, down $95.2 billion from the first seven months of FY 2025. Total fiscal year-to-date receipts were $3.32 trillion, up 6.7 percent, from the same period last fiscal year. Meanwhile, total outlays increased only 2.8 percent to $4.27 trillion.

The Treasury's borrowing limit was raised to $41.1 trillion with the passage of the One Big Beautiful Bill Act in July 2025. As of April 2026, gross federal debt stood at $39.0 trillion, while debt held by the public was $31.3 trillion.

Monetary Policy

The Federal Open Markets Committee (FOMC) eased monetary policy from the September 2024 meeting to December 2025, when the target rate for the federal funds rate stood at 3.5-3.75 percent. At each of the three meetings held thus far in 2026, the Committee has maintained that target range.

In the statement accompanying the April 2026 meeting, the FOMC observed that, "Recent indicators suggest that economic activity has been expanding at a solid pace. Job gains have remained low, and the unemployment rate has been little changed in recent months. Inflation is elevated, in part reflecting the recent increase in global energy prices." The statement added that, "Developments in the Middle East are contributing to a high level of uncertainty about the economic outlook." The statement reiterated that, "The Committee would be prepared to adjust the stance of monetary policy as appropriate if risks emerge that could impede the attainment of the Committee's goals. The Committee's assessments will take into account a wide range of information, including readings on labor market conditions, inflation pressures and inflation expectations, and financial and international developments."

Chair Keven Warsh was sworn into office in May 2026, following his confirmation by the Senate. Mr. Warsh's first FOMC meeting as chair of the FOMC will be June 16-17.

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the Fiscal Year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a Fiscal Year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1, FFO-2, and FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and Fiscal Year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.
- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.
- Table **FFO-3** details on- and off-budget outlays by agency.
- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current Fiscal Year to date and prior Fiscal Year to date.
- Table **FFO-5** summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a Fiscal Year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

- Table **FFO-6** includes customs collection of duties, taxes, and fees by districts and ports.

Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source

[Source: Office of Tax Analysis, Office of Tax Policy]

Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of Fiscal Year 2026 supplements fiscal data reported in the March issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes— Individual income tax receipts, net of refunds, were $639.2 billion for the second quarter of Fiscal Year 2026. This is an increase of $13.6 billion over the comparable prior year quarter. Withheld receipts increased by $3.7 billion and non-withheld receipts increased by $29.8 billion during this period. Refunds increased by $20.0 billion over the comparable Fiscal Year 2025 quarter. There was a negligible change in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in Fiscal Year 2025.

Corporate income taxes— Net corporate income tax receipts were $34.4 billion for the second quarter of Fiscal Year 2026. This is a decrease of $17.8 billion compared to the prior year second quarter. The $17.8 billion change is comprised of a decrease of $5.4 billion in estimated and final payments, and an increase of $12.4 billion in corporate refunds.

Employment taxes and contributions— Employment taxes and contributions receipts for the second quarter of Fiscal Year 2026 were $457.6 billion, an increase of $24.8 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by $17.4 billion, $3.0 billion, and $4.5 billion respectively. There was a negligible accounting adjustment for prior years employment tax liabilities made in the second quarter of Fiscal Year 2026. There was a negligible adjustment in the second quarter of Fiscal Year 2025.

Unemployment insurance—Unemployment insurance receipts, net of refunds, for the second quarter of Fiscal Year 2026 were $6.1 billion, a decrease of $1.6 billion over the comparable quarter of Fiscal Year 2025. Net State taxes deposited in the U.S. Treasury decreased by $1.4 billion to $3.4 billion. Net Federal Unemployment Tax Act taxes decreased by $0.2 billion to $2.7 billion.

Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source, continued

Contributions for other insurance and retirement— Contributions for other retirement were $2.2 billion for the second quarter of Fiscal Year 2026. This did not change significantly from the comparable quarter of Fiscal Year 2025.

Excise taxes— Net excise tax receipts for the second quarter of Fiscal Year 2026 were $23.2 billion, an increase of $2.6 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were $0.8 billion, a decrease of $1.1 billion over the comparable prior year quarter.

Estate and gift taxes— Net estate and gift tax receipts were $11.5 billion for the second quarter of Fiscal Year 2026. These receipts represent an increase of $5.3 billion over the same quarter in Fiscal Year 2025.

Customs duties— Customs duties net of refunds were $76.5 billion for the second quarter of Fiscal Year 2026. This is an increase of $53.7 billion over the comparable prior year quarter.

Miscellaneous receipts— Net miscellaneous receipts for the second quarter of Fiscal Year 2026 were $7.3 billion, not a significant change over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks decreasing by $0.3 billion.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the "Treasury Bulletin" reflect the total. Further detailed information is published in the "Monthly Statement of the Public Debt of the United States." Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

Treasury's Bureau of the Fiscal Service compiles data in the "Treasury Bulletin" tables FD-2 and FD-6 from the "Monthly Statement of the Public Debt of the United States."

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government.")

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

INTRODUCTION: Bureau of the Fiscal Service Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities.

The Bureau of the Fiscal Service is a new bureau within the Treasury Department, formed on October 7, 2012, from the consolidation of the Financial Management Service and the Bureau of the Public Debt. Our mission is to promote the financial integrity and operational efficiency of the U.S. government through exceptional accounting, financing, collections, payments, and shared services. As one bureau, the organization is better positioned to help transform financial management and the delivery of shared services in the federal government. The bureau will be a valued partner for agencies as they work to strengthen their own financial management or as they look for a quality service provider who can allow them to focus on their missions.

Table **PDO-1** presents the results of weekly auctions of 4-, 8-, 13-, 17-, and 26-week bills. Treasury bills mature each Thursday. Issues of 4- and 8-week bills are *reopenings* of 17-week bills. Issues of 13-week bills are *reopenings* of 26-week bills. High rates on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive basis.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to $5 million in each auction of securities.

Table **PDO-2** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Issues of *cash management* bills also are presented.

Note: On July 31, 2013, Treasury published amendments to its marketable securities auction rules to accommodate the auction and issuance of Floating Rate Notes (FRNs). An FRN is a security that has an interest payment that can change over time. Treasury FRNs will be indexed to the most recent 13-week Treasury bill auction High Rate, which is the highest accepted discount rate in a Treasury bill auction. FRNs will pay interest quarterly.

TREASURY FINANCING: JANUARY - MARCH

[Source: Bureau of the Fiscal Service, Division of Financing Operations]

JANUARY

Auction of 3-Year Notes

On January 8, 2026, Treasury announced it would auction $58,000 million of 3-year notes. The issue was to refund $95,595 million of securities maturing January 15 and to raise new cash of approximately $23,405 million.

The 3-year notes of Series AJ-2029 were dated and issued January 15. They are due January 15, 2029, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of 3-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 11:00 a.m. Eastern Time (ET) for noncompetitive tenders and before 11:30 a.m. ET for competitive tenders on January 12. Tenders totaled $153,712 million; Treasury accepted $58,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.609 percent with an equivalent price of $99.692698. Treasury accepted in full all competitive tenders at yields lower than 3.609 percent. Tenders at the high yield were allotted 77.54 percent. The median yield was 3.560 percent, and the low yield was 3.500 percent. Noncompetitive tenders totaled $205 million. Competitive tenders accepted from private investors totaled $57,541 million.

In addition to the $58,000 million of tenders accepted in the auction process, Treasury accepted $16,882 million from Federal Reserve Banks (FRBs) for their own accounts. The minimum par amount required for Separate Trading of Registered Interest and Principal Securities (STRIPS) of notes of Series AJ-2029 is $100.

Auction of 9-Year 10-Month 4 Percent Notes

On January 8, 2026, Treasury announced it would auction $39,000 million of 9-year 10-month 4 percent notes. The issue was to refund $95,595 million of securities maturing January 15 and to raise new cash of approximately $23,405 million.

The 9-year 10-month 4 percent notes of Series F-2035 were dated November 15 and issued January 15. They are due November 15, 2035, with interest payable on May 15 and November 15 until maturity.

Treasury received tenders for the notes before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on January 12. Tenders totaled $99,592 million; Treasury accepted $39,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.173 percent with an equivalent price of $98.607166. Treasury accepted in full all competitive tenders at yields lower than 4.173 percent. Tenders at the high yield were allotted 93.91 percent. The median yield was 4.125 percent, and the low yield was 4.000 percent. Noncompetitive tenders totaled $76 million. Competitive tenders accepted from private investors totaled $38,924 million. Accrued interest of $6.74033 per $1,000 must be paid for the period from November 15 to January 15.

In addition to the $39,000 million of tenders accepted in the auction process, Treasury accepted $11,352 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series F-2035 is $100.

Auction of 29-Year 10-Month 4-5/8 Percent Bonds

On January 8, 2026, Treasury announced it would auction $22,000 million of 29-year 10-month 4-5/8 percent bonds. The issue was to refund $95,595 million of securities maturing January 15 and to raise new cash of approximately $23,405 million.

The 29-year 10-month 4-5/8 percent bonds of November 2055 were dated November 15 and issued January 15. They are due November 15, 2055, with interest payable on May 15 and November 15 until maturity.

Treasury received tenders for the bonds before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on January 13. Tenders totaled $53,206 million; Treasury accepted $22,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.825 percent with an equivalent price of $96.842230. Treasury accepted in full all competitive tenders at yields lower than 4.825 percent. Tenders at the high yield were allotted 32.35 percent. The median yield was 4.780 percent, and the low yield was 2.880 percent. Noncompetitive tenders totaled $32 million. Competitive tenders accepted from private investors totaled $21,968 million. Accrued interest of $7.79351 per $1,000 must be paid for the period from November 15 to January 15.

In addition to the $22,000 million of tenders accepted in the auction process, Treasury accepted $6,404 million from FRBs for their own accounts. The minimum par amount required for STRIPS of bonds of November 2055 is $100.

Auction of 52-Week Bills

On January 15, 2026, Treasury announced it would auction $50,000 million of 364-day Treasury bills. They were issued January 22 and will mature January 21, 2027. The issue was to refund $280,566 million of all maturing bills and to raise new cash of approximately $20,434 million. Treasury auctioned the bills on January 20. Tenders totaled $170,944 million; Treasury accepted $50,000 million, including $1,506 million of noncompetitive tenders from the public. The high bank discount rate was 3.390 percent.

In addition to the $50,000 million of tenders accepted in the auction process, Treasury accepted $2,173 million from FRBs for their own accounts.

Auction of 10-Year Treasury Inflation Protected Security (TIPS)

On January 15, 2026, Treasury announced it would auction $21,000 million of 10-year TIPS. The issue was to raise new cash of approximately $21,000 million.

The 10-year TIPS of Series A-2036 were dated January 15 and issued January 30. They are due January 15, 2036, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of 1-7/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the TIPS before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on January 22. Tenders totaled $49,899 million; Treasury accepted $21,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.940 percent with an equivalent adjusted price of $99.193557. Treasury accepted in full all competitive tenders at yields lower than 1.940 percent. Tenders at the high yield were allotted 28.67 percent. The median yield was 1.880 percent, and the low yield was 1.800 percent. Noncompetitive tenders totaled $133 million. Competitive tenders accepted from private investors totaled $20,867 million. Adjusted accrued interest of $0.77521 per $1,000 must be paid for the period from January 15 to January 30. Both the unadjusted price of $99.413260 and the unadjusted accrued interest of $0.77693 were adjusted by an index ratio of 0.99779, for the period from January 15 to January 30. The minimum par amount required for STRIPS of TIPS of Series A-2036 is $100.

FEBRUARY

Auction of 19-Year 10-Month 4-5/8 Percent Bonds

On January 15, 2026, Treasury announced it would auction $13,000 million of 19-year 10-month 4-5/8 percent bonds. The issue was to refund $225,914 million of securities maturing January 31 and to raise new cash of approximately $86 million.

The 19-year 10-month 4-5/8 percent bonds of November 2045 were dated November 15 and issued February 2. They are due November 15, 2045, with interest payable on May 15 and November 15 until maturity.

Treasury received tenders for the bonds before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on January 21. Tenders totaled $37,210 million; Treasury accepted $13,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.846 percent with an equivalent price of $97.194489. Treasury accepted in full all competitive tenders at yields lower than 4.846 percent. Tenders at the high yield were allotted 3.89 percent. The median yield was 4.806 percent, and the low yield was 2.880 percent. Noncompetitive tenders totaled $47 million. Competitive tenders accepted from private investors totaled $12,953 million. Accrued interest of $10.09323 per $1,000 must be paid for the period from November 15 to February 2.

In addition to the $13,000 million of tenders accepted in the auction process, Treasury accepted $916 million from FRBs for their own accounts. The minimum par amount required for STRIPS of bonds of November 2045 is $100.

Auction of 2-Year Notes

On January 22, 2026, Treasury announced it would auction $69,000 million of 2-year notes. The issue was to refund $225,914 million of securities maturing January 31 and to raise new cash of approximately $86 million.

The 2-year notes of Series U-2028 were dated January 31 and issued February 2. They are due January 31, 2028, with interest payable on July 31 and January 31 until maturity. Treasury set an interest rate of 3-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on January 26. Tenders totaled $189,717 million; Treasury accepted $69,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.580 percent with an equivalent price of $99.846980. Treasury accepted in full all competitive tenders at yields lower than 3.580 percent. Tenders at the high yield were allotted 52.25 percent. The median yield was 3.540 percent, and the low yield was 3.490 percent. Noncompetitive tenders totaled $350 million. Competitive tenders accepted from private investors totaled $68,645 million. Accrued interest of $0.19337 per $1,000 must be paid for the period from January 31 to February 2.

In addition to the $69,000 million of tenders accepted in the auction process, Treasury accepted $4,862 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series U-2028 is $100.

Auction of 5-Year Notes

On January 22, 2026, Treasury announced it would auction $70,000 million of 5-year notes. The issue was to refund $225,914 million of securities maturing January 31 and to raise new cash of approximately $86 million.

The 5-year notes of Series U-2031 were dated January 31 and issued February 2. They are due January 31, 2031, with interest payable on July 31 and January 31 until maturity. Treasury set an interest rate of 3-3/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on January 27. Tenders totaled $163,602 million; Treasury accepted $70,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.823 percent with an equivalent price of $99.670556. Tenders totaled $46,930 million; Treasury accepted $19,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.896 percent with an equivalent adjusted price of $99.896801. Treasury accepted in full all competitive tenders at yields lower than 1.896 percent. Tenders at the high yield were allotted 93.45 percent. The median yield was 1.825 percent, and the low yield was 1.775 percent. Noncompetitive tenders totaled $45 million. Competitive tenders accepted from private investors totaled $18,955 million. Adjusted accrued interest of $3.88801 per $1,000 must be paid for the period from January 15 to March 31. Both the unadjusted price of $99.810964 and the unadjusted accrued interest of $3.88467 were adjusted by an index ratio of 1.00086, for the period from January 15 to March 31.

In addition to the $19,000 million of tenders accepted in the auction process, Treasury accepted $1,963 million from FRBs for their own accounts. The minimum par amount required for STRIPS of TIPS of Series A-2036 is $100.

Auction of 2-Year Notes

On March 19, 2026, Treasury announced it would auction $69,000 million of 2-year notes. The issue was to refund $135,446 million of securities maturing March 31 and to raise new cash of approximately $79,554 million.

The 2-year notes of Series AZ-2028 were dated and issued March 31. They are due March 31, 2028, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 3-7/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on March 24. Tenders totaled $168,389 million; Treasury accepted $69,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.936 percent with an equivalent price of $99.883774. Treasury accepted in full all competitive tenders at yields lower than 3.936 percent. Tenders at the high yield were allotted 20.78 percent. The median yield was 3.865 percent, and the low yield was 3.700 percent. Noncompetitive tenders totaled $485 million. Competitive tenders accepted from private investors totaled $68,415 million.

In addition to the $69,000 million of tenders accepted in the auction process, Treasury accepted $7,130 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series AZ-2028 is $100.

Auction of 5-Year Notes

On March 19, 2026, Treasury announced it would auction $70,000 million of 5-year notes. The issue was to refund $135,446 million of securities maturing March 31 and to raise new cash of approximately $79,554 million.

The 5-year notes of Series W-2031 were dated and issued March 31. They are due March 31, 2031, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 3-7/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on March 25. Tenders totaled $160,115 million; Treasury accepted $70,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.980 percent with an equivalent price of $99.528167. Treasury accepted in full all competitive tenders at yields lower than 3.980 percent. Tenders at the high yield were allotted 89.88 percent. The median yield was 3.923 percent, and the low yield was 3.860 percent. Noncompetitive tenders totaled $154 million. Competitive tenders accepted from private investors totaled $69,846 million.

In addition to the $70,000 million of tenders accepted in the auction process, Treasury accepted $7,233 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series W-2031 is $100.

Auction of 7-Year Notes

On March 19, 2026, Treasury announced it would auction $44,000 million of 7-year notes. The issue was to refund $135,446 million of securities maturing March 31 and to raise new cash of approximately $79,554 million.

The 7-year notes of Series J-2033 were dated and issued March 31. They are due March 31, 2033, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 4-1/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon ET for noncompetitive tenders and before 1:00 p.m. ET for competitive tenders on March 26. Tenders totaled $107,006 million; Treasury accepted $44,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.255 percent with an equivalent price of $99.970004. Treasury accepted in full all competitive tenders at yields lower than 4.255 percent. Tenders at the high yield were allotted 24.47 percent. The median yield was 4.190 percent, and the low yield was 2.880 percent. Noncompetitive tenders totaled $108 million. Competitive tenders accepted from private investors totaled $43,892 million.

In addition to the $44,000 million of tenders accepted in the auction process, Treasury accepted $4,546 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series J-2033 is $100.

[1] Currently, all issues are sold at auction. For bill issues, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-1. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.
[2] From date of additional issue in case of a reopening.
[3] In reopenings, the amount accepted is in addition to the amount of original offerings.
[4] Includes securities issued to the Federal Reserve System; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

Note—Amounts listed as tendered and accepted are amounts tendered and awarded on auction day.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Fiscal Service revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Bureau of the Fiscal Service compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, Bureau of the Fiscal Service revised procedures and categories in this table to agree with the Bureau of the Fiscal Service's publication changes.

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated ownership of U.S. Treasury securities. Information is primarily obtained from the Federal Reserve Board of Governors Flow of Funds data, Table L209. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

From December 2014 to September 2018, includes savings bonds issued to myRA accounts. Current accrual value.

6 Includes U.S. Treasury securities held by the Federal Employees Retirement System Thrift Savings Plan "G Fund".

[7] Includes money market mutual funds, mutual funds, and closed-end investment companies.

[8] Source: Treasury International Capital Survey (https://ticdata.treasury.gov/resource-center/data-chart-center/tic/Documents/slt_table5.html). Includes Treasury securities and Treasury deposit funds. Includes nonmarketable foreign series through February 2023. Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York. For additional information, see: https://home.treasury.gov/data/treasury-international-capital-tic-system

[9] Includes individuals, Government-sponsored enterprises, brokers and dealers, bank personal trusts and estates, corporate and non-corporate businesses, and other investors.

*The "Insurance companies" data presented in Treasury Bulletin issues from December 2018 through June 2021 have been revised. Beginning with the December 2018 TB issue and June 2018 data, ownership data for property-casualty insurance companies was not included in the total, nor were updates to historical data captured due to a change in the FRB Flow of Funds Z.1 release series reporting this data. This new series is now being captured and "Insurance companies" data have been revised back to June 2013.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

June 30, 1975	81,196	380

[1] Issued on or after July 1, 1929.
[2] Excludes coins sold to collectors at premium prices.
[3] Includes $481,781,898 in standard silver dollars.
[4] Based on Bureau of the Census estimates of population.
[5] Represents value of certain partial denominations not presented for redemption.

INTERNATIONAL STATISTICS

Foreign Currency Positions
Exchange Stabilization Fund

INTRODUCTION: Foreign Currency Positions

The "Treasury Bulletin" reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate "all other" currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than $50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than $5 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VI-1 present the currency data reported weekly by major market participants. Tables I-2 through VI-2 present more detailed currency data of major market participants, based on monthly reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants that do not file weekly reports. The information in the tables referenced above is based on the reports referenced in this Introduction: Foreign Currency Positions and is not audited by the Federal Reserve banks or the Treasury Department.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option's value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

The data reported herein may occasionally differ with respect to time periods noted in prior issues of this Bulletin due to revisions from reporting market participants that arise from quality assurance controls.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934, codified at 31 United States Code 5302, which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose to reflect termination of the fixed exchange rate system.

Section 4027 of H.R. 748, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), enacted on March 27, 2020, as Pub. Law 116-136, appropriated $500 billion to the ESF, however, subsequent acts in 2021 and 2023 rescinded $480.6 billion.

Resources of the fund include (a) Fund Balance, which is available to support adjustments to loan and investment subsidy costs, repay borrowing from Treasury for loans and investments and expenditures for administrative expenses in support of the CARES Act, (b) U.S. Government securities (dollar balances), (c) special drawing rights (SDRs), an international reserve asset created by the International Monetary Fund (IMF), (d) foreign currency holdings and (e) Investments in Special Purposes Vehicles. Principal sources of revenue -+ or cost -- for the fund are gains-+ or losses -- on SDRs and foreign investments, and interest earned on U.S Government, foreign securities, and SDRs.

- **Table ESF-1** presents the assets, liabilities, and net position of the fund. The figures are in U.S. dollars. Amounts and transactions pertaining to foreign currencies and SDRs have been converted to U.S. dollars based on current exchange rates computed according to the accrual method of accounting. Investments and loans receivable are reported at fair value. Unexpended Appropriations Funds from Dedicated Collections represents the original capital appropriated to the fund by Congress of $2 billion, minus a subsequent transfer of $1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Unexpended Appropriations Funds from Other than Dedicated Collections represent the amount appropriated under the CARES Act Sec 4027 minus transfers, expenditures for administrative and subsidy costs, and rescissions. Conversion gains and losses are reflected in the cumulative net income -+ or loss -- account.

- **Table ESF-2** shows net cost from operations for the current quarter and year-to-date. Figures are in U.S. dollars computed according to the accrual method. Gross Cost for the ESF reflects both interest expense and losses on the revaluation of SDR holdings, SDR allocations and foreign currency portfolio for the quarter. Earned Revenue for the ESF reflects both interest income and gains on the revaluation of SDR holdings, SDR allocations and foreign currency portfolio for the quarter. Gains and Cost of Investments in Special Purpose Vehicles and Loans Receivable reflect the revaluation of the assets approved in the federal budget. Economic Recovery Program related, interest expense, interest income and administrative costs incurred in connection with the loans, and other investments are accrued throughout the fiscal year.

Total Net Cost of Operations	**146,355**	**107,637**

[1] Beginning July 1974, the International Monetary Fund adopted a technique for valuing the SDRs based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

Note—Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

SPECIAL REPORTS

Trust Funds

TABLE TF-6A—Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents estimates concerning the Highway Trust Fund at the close of the next fiscal year.

The 48-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury's Office of Tax Analysis for excise taxes, net of refunds.

Highway Account

[In billions of dollars. Source: DOT]

Commitments (unobligated balances plus unpaid obligations, fiscal year 2027)	129
less:	
Cash balance (fiscal year 2027)	19
Unfunded authorizations (fiscal year 2027)	110
48-month revenue estimate (fiscal years 2028, 2029, 2030, and 2031)	159

Note—Detail may not add due to rounding.
48-month revenue estimate reflects FY 2027 President's Budget projections.

Note—Reflects extension of authorized revenue collection and funding levels prescribed in P.L. 117-58.

Mass Transit Account

[In billions of dollars. Source: DOT]

Commitments (unobligated balances plus unpaid obligations, fiscal year 2027)	53
less:	
Cash balance (fiscal year 2027)	(1)
Unfunded authorizations (fiscal year 2027)	54
48-month revenue estimate (fiscal years 2028, 2029, 2030, and 2031)	26

Note—Detail may not add due to rounding.
48-month revenue estimate reflects FY 2027 President's Budget projections.

Note—Reflects extension of authorized revenue collection and funding levels prescribed in P.L. 117-58.

Glossary

With References to Applicable Sections and Tables

Source: Bureau of the Fiscal Service

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-1, -2)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority ("Federal Fiscal Operations")—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-1)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders ("Treasury Financing Operations")— A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt.

Pursuant to 31 U.S.C. 3101(b). By the Continuing Appropriations Act, 2018 and Bipartisan Budget Act, 2018, Public Law 115-119, the Statutory Debt Limit was suspended through March 1, 2019.

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-1)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions ("Federal Fiscal Operations")—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item "Federal Reserve notes—amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign-targeted issue (PDO-2)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by

Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-Age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions ("Federal Fiscal Operations")—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund transactions ("Exchange Stabilization Fund", ESF-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions ("Federal Fiscal Operations")—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Noncompetitive tenders ("Treasury Financing Operations")—This is a tender or bid to purchase a stated par amount of securities at the highest yield or discount rate awarded to competitive bidders for a single-price auction.

Obligations ("Federal Fiscal Operations")—An unpaid commitment to acquire goods or services.

Off-budget Federal entities ("Federal Fiscal Operations")—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays ("Federal Fiscal Operations")—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Par value—The face value of bonds or notes, including interest.

Quarterly financing ("Treasury Financing Operations")—Treasury has historically offered packages of several "coupon" security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Receipts ("Federal Fiscal Operations")—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-2)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights ("Exchange Stabilization Fund," ESF-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members' quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot ("Foreign Currency Positions")—Due for receipt or delivery within 2 workdays.

State and local government series (SLGS) (FD-2)—Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLGS are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-2)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as $1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.

Trust fund transaction ("Federal Fiscal Operations")— An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 ($5-$1,000 notes); 1862 ($1-$2 notes); 1863 ($5-$1,000 notes); 1863 ($1-$10,000 notes); and 1901 ($10 notes).
